

Logic Games

Let's play a game, a logic game! Specifically, we will play the type of logic game given to potential lawyers when applying to law school. Logic in general is essential to making persuasive arguments, and recognizing the flaws in unsound arguments, which seems more important than ever these days. (Both are also crucial of course in mathematics!) For our purposes, given a limited set of rules to play around with, we will guess the combination to a lock, and figure out the schedule to a film festival. It may be helpful to have different colored writing tools!

Come join us virtually at the:

EVANSTON MATH CIRCLE **Saturday, November 21, 11-12:30**

The session will be held live via Zoom. A link to the meeting will be sent out to those on our email list the morning of the event.

Math Circle is geared towards eager middle-school students, but students of other ages and backgrounds are welcome as well. More information is available at <http://www.math.northwestern.edu/~scanez/mathcircle/>
