

Crossing Bridges

Imagine a city with a river running through it, and bridges arranged as follows:

Is it possible to create a path through the city which will cross each bridge exactly once? We'll explore this and related questions! Come join us at the

EVANSTON MATH CIRCLE Saturday, September 15

Northwestern University
Lunt Hall Room 218, 11:00 AM to 12:30pm

Math Circle is geared towards middle- and beginning high-school students, but students of other ages and backgrounds are welcome as well. More information is available at <http://www.math.northwestern.edu/~scanez/mathcircle/>
